Terms of use: December 8, 2020 Version 1.4.70 - Improved Performance! - Small errors have been corrected! Okay, so I'd like to start with this great game and all, but there are some issues here. As you know, the enemy gets an update quickly where you update to beat them, but the prices for upgrades are insane by the time they have their entire army at level 2 you only have a spear and archer upgraded to lvl 2 because the prices are great for players who don't spend money on on Game. Maybe lower the prices to half of what they were so players could actually start updating. Also, about your epic troops I realize that you want money and all but the epic price of troops in gems is almost impossible to get considering how many gems you get for the round I'm now trying to hate on the game it's just priceing ridiculously expensive. And there are two ways to fix these problems, which are 1 below the price of 2 to increase the amount of money you get per round for a more reasonable amount to pay for upgrades, which on average I would bring to 500. For victory and 50 for defeat. Also, I would suggest making it to a place where you can see the health of the opponent, which would just be very helpful. But in conclusion thank you for reading and please listen to this can probably make your game better. I love this game and I'm totally addicted to it and I've only had it for about two days. I have a few suggestions, number 1: it would be great if you had an officer unit that would make the troops fight harder and maybe act like a pirate.2: if you had Calvary, that was in the range would be great. So far the closest I have is a chariot witch too big. Please add something like a holgof guy on a horse with a musket or carbine. 3: If you're something of a historical battle mode or a more specific category I'd absolutely love it. So far I have only two rows of muskets and a few guns if I want to be a British Army. Basically, there should be a mode of history where perhaps you need to protect the village from Genghis Khan or attacking Gaul (France) as the King of the Vikings. Maybe add ships.4: a little more control would be good. As now I use Roman tactics with shield walls and spear-carrier, then guard blah. But! Shields always attack rather than defend, then the rest follow their example (except for the hesitant troops they are my little angels), so my army gets almost surrounded or they just pile and charge after others. 5: buildings. As mentioned in another review of the buildings will be a fun and challenging addition to the game. How you could build a castle in custom, that is a friend siege of his catapults, stairs and trebuchets. That's all I have to say, please read this and have a good day. This game is a lot of fun and very interesting, but it has serious balance problems like muskets until they have been nerfed they are still very much more powered. Another issue is how the under-powered AK-47 units and the M16 unit. They have no health and do not make sense. If their stats on all were improved they could use. I understand why they don't make them powerful because they will just be the next Musketeers, but they need a serious power increase. Epic fun units but don't have much they cost too much for what they are out of the way for sentry, and are under the food. A great example of this is he's a mini-gun, it's this not enough to deal with level units, and can be easily swarmed. The Cavalry need momentum except for the camels, they don't have much use except for distractions. It would be nice to be able to clean just me side of the card during custom. Last all melee except spearman need to be promoted, guards and berserkers especially, guards try to have a place but do not do enough to justify the cost, for the shield wall shield unit is just better and to attack any thing is better just because they cost less and berserkers do not have much use, either lower the price or give them a boost, too, justify their value so much how many cavalry. Although there are many problems with balance, this game is still super fun and I would recommend playing. Lords Mobile: Build an Empire to Destroy Your Enemies Fight Stick War Figure Ultimate Epic Battle Simulator Free Download PC games pre-installed in direct communication. Ultimate Epic Battle Simulator was released on April 12, 2017About The GameHere is a sandbox like no other. Create massive battles without restrictions. Want to see 10,000 chickens fight the army of Romans?? Of course, why not. Want to see a company of WW2 American soldiers fight 11,000 medieval soldiers?? There are simply no restrictions on the carnage you can achieve in Epic Battle Simulator. Clutter around with a massive variety of units. Everything from, Roman centurions, medieval soldiers, knights, orcs, trolls, and yes, chickens! The main focus of this game does not give the player any restrictions on what he can do. So we decided not to limit the number of units in combat. Want to see what a 100,000-unit battle looks like? We don't recommend going past 10,000 for most machines, but its your processor, do what you want! In addition, you can play like any of the units in the game, getting up close and personal to help change the tides of mass battle, while rallying teammates and giving them orders!
